A GOOD PLACE TO TRADE.

Calendar.

October—
23—"Aunt Mary's Family Album," a play by members of the Women's Institute.
21—Auction Sale in Stony, 200 sets of Harness, by Auctioneer McKenna.
24—Hon. Chas. Stewart speaks in Ducholke Hall.
27—Hon J E Brownlee speaks in Ducholke Hall.
28—Sitting of District Court, in Stony Plain.
29—Election of members to the House of Commons.

November—
5—Helge Anderson's orchestra, Holborn Hall.
6—Inga Councillors meet in Stony Plain.
9—Thanksgiving Day.
11—Auction sale at Val Kulak's farm, 2 miles south of Stony.
12—Sale of lands, by Spruce Grove M. D.
13—"Voice of Authority," a play by the Girls' Club.
28—Union Ladies' Aid's annual bazar.

TENDERS FOR SCHOOL-HOUSE.

Sealed Tenders will be received by the Board of Trustees of Glory Hills School District No. 400 at the office of the Secretary-Treasurer up to noon on October 31st, 1925, for the erection of a two-roomed Frame School Building after Plan Number B. I. Plans and Specifications may be obtained from the Secretary-Treasurer on payment of a deposit of $5.00. Plans must be returned within 24 hours, and deposit will then be refunded.

A marked check for five per cent of the amount of tender should be enclosed with each tender as a guarantee that same is bona fide.

The lowest or any tender will not necessarily be accepted.

C. B. GIEBELHAUS,
Secretary-Treasurer.

Church Dedication

The consecration of Immanuel's Lutheran Church at Rosenthal took place on Sunday last, Oct. 18. So many were the friends of the congregation who wished to attend the services that the building was crowded to the doors, and many could not find room within.

The sister congregations of Spruce Grove, Golden Spike and even Leduc, were represented by a large number of their members. The visiting pastors expounded in a splendid manner the purpose and the usefulness of this house of worship.

The local pastor gave a short history of the congregation. In the spring of 1891 the first Lutheran pastor arrived in this district. It was the Rev Ferdinand Pempeit, missionary pastor of the Evangelical Lutheran Synod of Canada. In June 1891 he organised the St Matthew's congregation at Spruce Grove, and in July Immanuel's congregation at Rosenthal.

Immanuel's built its first church in 1903. This edifice was served as a place of worship for 22 years. On June 29 of the present year the ground was broken for a new building. Mr Jacob J Kulak, an elder of the church, directed and supervised the building operations in a very efficient way. The members did most of the work without compensation. Only a small debt remains on the edifice. The offerings brought the sum of $137, which was assigned to the building fund.

The ladies of the church deserve the thanks of all the members and guests for the good dinner they had prepared and served in the old church building.

Rev G Poetzsch, who has served the congregation since Sept 1 1915, called the special attention of the audience to the peaceful and willing attitude of the members during the time of building.

LOCAL NEWS.

John Eberhardt, Edson, was in Stony over the week-end.

Mr Geo Smith has gone to Coalspur.

Mr Carl Pfeifer left Montreal Tuesday for the old country, sailing on the R. M. S. Passport.

Jas Hollands and wife, Edmonton, were week-end visitors with Mr and Mrs A E Michael.

M Comisarow, Leduc, was visiting in Stony yesterday, with his son.

The play given tomorrow night by the Women's Institute will be followed by a dance; Barth's Orchestra.

Miller's General Store and Hardwick's General Store each got in a car of fruit last week, mostly apples.

For defrauding Carl Pfeifer, Stony Plain, out of goods and money amounting to $38.90, Jack Bozanto was given 20 days in gaol by Judge Taylor in the Criminal Court, Edmonton, the judge taking into consideration the fact that Jack had been in custody 10 days already.

The chicken shooting season closes Sat. Oct. 31.

Mr Val Kulak Jr is holding a clearance sale, at his farm, of stock and implements, on Wednesday Nov. 11th. See posters.

A very charming surprise party was held last Sunday evening at the home of Mr and Mrs Hy Schellenberger, on the anniversary of the natal day of Mrs Schellenberger. A large party of friends and neighbors were in attendanbe to help in the celebration, and the worthy lady was the recipient of numerous hearty congratulations and good wishes from her friends.

Mr Anderson, who delighted the crowd at Holborn Hall some time ago by his selections on the accordeon, has been engaged for the night of Thursday Nov. 5.

While motoring home along the Baseline on Friday night, after a business trip to Stony, Mr Philip Schwindt is said to have lost control of his car and bumped into a Ford coupe driven by a gentleman from the City, near Rivest's corner. Each car was damaged, the City car coming off the worst of the two. Officer J. Smith is investigating the cause of the accident.

Tomorrow Night's Play

Following is the cast for the play Aunt Mary's Family Album:

Mrs Kelly, Mrs Brooks
Mrs De Vere, Mrs Clark
Mrs Barton, Mrs Lory
Mrs Gondsense, Mrs Kowensky
Mrs Vernon Mrs Ostway
Mrs Good, Mrs Michael
Rachael Thomas' wife, Mrs Elliot
Miss Skinning, a man hater, Mrs Jas Smith
Mrs Runkle, Mrs Duthie
Mrs Meek, Mrs Umbach
Mrs Bond, Mrs M Simpson
Mrs Lane Mrs Kibblewhite

Voting

Throughout Canada on October 29 the question, "Have you voted yet?" will be asked not once but thousands of times. What the questioner will mean, of course, is, have you exercised your franchise? That is the superficial meaning, but is there not a much deeper, more significant meaning? Do you really "vote," or—just mark a ballot paper? There is a vast difference between the two.

Admittedly it is a duty every elector owes his country to exercise his or her franchise when called upon to do so. It is just as much a duty as paying taxes or obeying the law, even though no penalty is imposed for non-fulfilment of the duty.

Electors will be urged to "vote early," and this is good advice because there are always people who will leave the performance of this duty to the last minute, while circumstances may force others to do so. Everyone who can should, therefore, go to the polls as early as possible on election day. But while making haste to the polling booth, do not be hasty in your act of voting.

To come back to the original question, are you really going to vote or merely mark a ballot paper?

Are you going to vote Conservative, or Liberal, or Progressive because your father or grandfather voted that way, or because some friend or relative is so voting, or because the majority of people in your neighborhood intend to do so and you wish to be with the local majority? If so, you are not voting at all, but just marking a ballot paper.

Or are you going to vote for a particular party solely because you voted for it on previous occasions and you propose to be "consistent?" Consistent to what? A party name? A policy or policies which may have appealed to your forebears or yourself in years gone by and which were designed to meet then existing conditions but which do not necessarily have any force or bearing in 1925?

Perhaps it is your intention to vote for a certain candidate regardless of the party or policy he supports solely because you know him and like him—although you may not know him, you do not like the opposing candidate or candidates.

Again, it may be that you are influenced in your decision as to how your ballot paper will be marked by some purely local or sectional consideration which has little or no bearing on the welfare of Canada as a whole.

It may even be that some people have decided to mark their ballot papers in a certain way with no more worthy object in view than to "kill the vote" of somebody else they do not like but who they understand intends to vote the opposite way.

Not one of these are reasons supporting an intelligent marking of a ballot paper, nor are the motives actuating such marking ones worthy of an intelligent, patriotic Canadian citizen. Such conduct cannot honestly be dignified as "voting"; it is merely ballot paper marking, and, so far as Canada is concerned, worse than useless.

Stop and consider. On October 29 you are not voting primarily for a candidate or a party; you are voting for Canada, or ought to be. Parties and candidates are but the means to an end, but it is Canada, its welfare and progress which should be kept constantly in mind and guide the eye and hand when marking a ballot paper in the secret and sacred precincts of the polling booth.

True, the candidate beside whose name you place a cross is your choice to represent you in the Parliament of the Dominion for the next four or five years. True, the election or rejection of that candidate will have a bearing on the issue as to which party will be entrusted with the responsibilities of government and of formulating the policies and directing the administration of the Dominion.

But these two issues—the really vital issues—are big enough to call forth the exercise of every elector's best judgment unwarped by any of the petty, inconsequent, yes, altogether unworthy, considerations and motives which, unfortunately, are sometimes allowed to sway the feelings of people in times of election excitement.

If you were a shareholder in a large commercial enterprise attending the annual meeting of the company for whom would you vote as directors—men supporting policies which you were confident would result in increased business success and larger profits, or would you reject such men for some trivial reason or personal prejudice? Then remember on October 29 that you are a shareholder in the greatest of all great Canadian concerns, Canada itself, and that you are choosing your board of directors.

On election day, really vote, and do not just mark a ballot paper. Instead of hurrying into the polling booth and hastily scratching a cross opposite a name, stop with pencil poised and ask yourself: What is the best service I can render my country today? Then VOTE as your judgment and conscience dictates. This is of the essence of good citizenship.

Half a loaf is sometimes better than no chance to loaf at all.

Clubs are always trumps in the hands of the police.

TOOTHACHE
Bathe the face with Minard's in water and place a piece of cotton wool, saturated with Minard's in the cavity.

MINARD'S
"KING OF PAIN"
LINIMENT

The Oil of Power.—It is not claimed for Dr. Thomas' Eclectric Oil that it will remedy every ill, but its uses are so various that it may be looked upon as a general pain killer. It has achieved that greatness for itself and its excellence is known to all who have tested its virtues and learned by experience.

Apples On Prairies

Planting of apple seed in Manitoba and other sections of the prairies is rapidly increasing, according to the superintendent of the Morden experimental station. Ten fine apples of five varieties from Rathwell, Manitoba, recently reached Winnipeg. They are all of Russian origin, and the largest measured eleven and a quarter inches in circumference.

SUNDAY SCHOOL LESSON

OCTOBER 26

PAUL IN EPHESUS

Golden Text: For the love of money is a root of all kinds of evil. I. Timothy 6.10.

Lesson: Acts 18.18 to 19.41.

Devotional Reading: Isaiah 55.8-13.

The Text Explained and Illumined

A Silversmith Stirs Up a Riot Against Paul at Ephesus, verses 23-28.—The goddess Diana (Artemis), whose chief temple was at Ephesus, was the mother-goddess, the goddess of fertility, "the fountain of nourishment, the reproductive power that kept the great world ever the same amid the constant flux of things." Her shrine was constantly visited by crowds of pilgrims, and the making of miniature shrines for them and for the Ephesians was an important industry in Ephesus. There were tiny shrines which were worn as amulets, larger ones which were offered as gifts to the goddess, or were kept in the homes and even placed in the grave beside the corpse as a sign that the dead had gone back to the mother who bore him." Many of these little shrines made of marble or terra cotta have been found, but none of silver, the latter having been melted, no doubt, because of their intrinsic value. It was among the makers of these small shrines that no small stir arose concerning Christianity, or the Way.

Demetrius, a silversmith and maker of silver shrines, naturally gave considerable business to craftsmen and had therefore a hold upon them. These he gathered together with the workmen of like occupation, workers in terra cotta and marble, and reminded them that their prosperity came from their business. And then he reminded them how "this Paul" not only in Ephesus but throughout all the province of Asia had made many people believe that gods made with hands were not gods. There was grave danger that their trade would be taken away from them.

NERVOUS DEPRESSION

Why People are Low Spirited and Depressed

Nearly all women and most men suffer at times from fits of depression and low spirits. Everything seems a burden; then come periods of nervous irritability, headaches and weariness. People who suffer this way lack vitality because their blood is poor and nerves are starved in consequence.

The only way the nerves can be reached is through the blood. By enriching the blood with Dr. Williams' Pink Pills the starved nerves are supplied with just the elements they need. This is proved by the experience of Mrs. J. E. Dadson, 12th Ave., east, Vancouver, B.C., who says.—"About three years ago I became very weak and nervous. I had pains in my side and back, and also suffered from frequent pains in the back of my head and neck. I was hardly able to do anything about the house. I would wake with a start in the night and my heart would flutter so that it almost choked me. I tried much doctor's medicine, but it did me no permanent good. One day I read about Dr. Williams' Pink Pills and decided to give them a trial. These pills produced such a beneficial change in a short time that I kept taking them until I had used a dozen boxes. By this time there was such an improvement in my condition that friends would ask me what I was taking, and of course I was only too pleased to tell them it was Dr. Williams' Pink Pills. I am now feeling like a new person and am doing my own housework. We would not now be without Dr. Williams' Pink Pills in the house."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Wheat Pool in Alberta

The Alberta Wheat Pool is making a drive for another 1,000,000 acres. It already has 32,000 members representing more than 3,200,000 acres of wheat crop and it wants 10,000 more members.

Women and Asthma. Women are numbered among the sufferers from asthma by the countless thousands. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. J. D. Kellogg's Asthma Remedy has brought new hope and life to many such. Testimonials, sent entirely without solicitation, show the enormous benefit it has wrought among women everywhere.

When Segundo Tellechea, a butcher of Campo Florida, Cuba, won the $20,000 government lottery prize, he reduced meat prices far below any other butcher in Cuba.

Visits Balmoral Every Year

Matron of London Hospital Spends Fortnight With Queen Mary

No autumn passes without the paying of a long visit by Miss Agnes Keyser to the King and Queen at Balmoral. She stays for a fortnight or thereabouts, and accompanies the Queen on most of her walks in the ground, as well as longer expeditions. No other woman subject of any rank is honored by the Sovereigns in just that way; she can truly be said to be regarded as one of the family during her stay. For many years Miss Keyser, or, as she prefers to be called, "Sister Agnes," has been matron of the King Edward VII. Hospital for Officers, in Grosvenor Crescent, London. When Prince George had to undergo an operation three years ago it was there he went and when members of the royal household require to go to hospital they choose that managed by Sister Agnes.

As a vermifuge an effective preparation is Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

Sheffield Plate

The so-called Sheffield Plate, an imitation of silver made by pressing or "sweating" a thin skin of silver on to copper, was first made in England in the reign of George III.

How Trade Increases

Canadian trade increased during August nearly sixty millions, as compared with August, 1924. A summary issued by the department of customs shows that the grand total of exports and imports, including foreign merchandise exported, was $194,388,288 last month and in August, 1924, was $136,791,202.

TEETHING BABIES
Thousands of Them
DIE EVERY SUMMER

The Greatest Problem Facing Farmers of Canada Is That of Combatting Wheat Stem Rust

"The next big problem facing cerealists in Canada is that of combatting wheat stem rust," stated Dr. Charles E. Saunders, former Dominion cerealist and one of the leading plant breeders on the continent. "This is a matter of great importance and extreme difficulty, and it is not being adequately taken care of," he said.

The loss from this disease on the prairies is tremendous each year, and there is no method of combatting it by chemicals or by cultivation. The only way to overcome the difficulty, he said, was to propagate a rust-resisting strain, which would at the same time have characteristics of high yield, early maturity and drought resistance.

Dr. Saunders pointed out that there are seventeen kinds of stem rust on the prairies. These are found in different districts, though each district may be attacked by several varieties of rust. To fully study the disease, and to originate rust-resisting varieties of wheat, it is necessary that many experimental stations be established throughout the three prairie provinces. Only by the expenditure of a vast sum of money would the desired results be obtained.

The famous cerealist is best known as the originator of Marquis wheat, which is so popular on the prairies that more than eighty-five per cent. of the wheat there is of this variety. Dr. Saunders also originated the Prelude and Ruby varieties which made possible the extension of the wheat belt several hundred miles further north than it had been before.

The Dominion Government is at present introducing two other varieties propagated by Dr. Saunders. These are known as Garnet and Reward. After extensive tests they have been found to be unusually drought-resistant and particularly well adapted to cultivation in dry areas. These will make possible the production of wheat in many areas of the prairies where drought is common.

Dr. Saunders, though for twenty years primarily an agriculturist, is a keen student of French literature and also of music. Before entering the civil service he taught music, mostly vocal, and he has now returned to the realm of art. He resigned his position three years ago, and for more than two years has been studying French literature in Paris.

Producing Clean Milk

Guarding Against All Sources of Contamination In Milking Process

A clean pail, a covered pail and a clean animal are the big things in producing clean milk. All other sources of contamination are of lesser importance, states the Dominion agricultural bacteriologist in his report for 1924. To insure clean milk the pails should be washed and scoured, and, if possible, treated with steam, and care taken to have no dirt fall from the cow into the milk. The report, which is distributed free by the publications branch, department of agriculture, Ottawa, describes in detail the methods of insuring complete cleanliness. Manure should be moved out of the reach of the animals, the cows should be regularly brushed, the milker's hands must be carefully washed, and the foremilk should be discarded.

Oil Pollutes Sea

Fishermen, it is said, declare that the decline in the productiveness of many sea fishing grounds is due to the discharge of oil. Yet in its latest report, the fisheries department states that its scientific investigations "do not indicate that oil is actually injurious to fish life of any kind." Who is right? It is indisputable that the pollution of the sea with waste oil is killing large numbers of sea birds.—London Sunday Pictorial.

Motorist: "It's preposterous, my good man. I'm an expert driver. What'd know about driving would fill a book."

Constable: "And what you don't know would fill a hospital. Give us your name and address, now."

Meat and Bone By-Products

Constitute a Valuable Source of Protein and Bone-Making Material

The Dominion chemist, Dr. F. T. Shutt, and his assistant, Miss S. N. Hamilton, have prepared and the Dominion department of agriculture has published, a fourteen-page bulletin describing what is meant by "Meat and Bone By-products," and designed to furnish that knowledge of their composition and nature that is essential to their economic purchase and use. The feeding stuffs on the market that come under the foregoing heading includes meat and blood meals, tankage, bone meal, fish meals and other related materials, mainly the by-products of the packing house, slaughter house and fish canneries, and consist of varying proportions of meat, fatty tissue, blood and bone, according to their source and method of preparation. As a class, states the bulletin, they are highly nitrogenous and phosphatic concentrates that constitute a valuable source of protein and bone-making material and are especially useful in the feeding of swine and poultry. It is essential that they should be prepared from fresh materials and as purchased should be sweet and sound, free from rancidity and mould. As a consequence, continues the bulletin, which can be had on application to the publications branch, Ottawa, it is obvious that these feeding stuffs should be purchased always on guaranteed analysis. One object of the investigation, the results of which are recorded in this bulletin, was the establishment of standards, in percentages of protein, fat, and phosphate of lime, for the various classes of products under consideration.

Menagerie of Insect Life

The most amazing zoo in the world—a 40-acre menagerie of insect life—has been opened near Tuxedo, New York. It is the idea of Dr. Frank E. Lutz, curator of entomology at the American Museum of National History, who made a collection of 836 species of insects that were caught in his backyard.

The Royal Veterinary College in London cares for domestic animals in all their injuries and ailments and is the largest institution of its kind in the world.

Secret of Stabilized Population Of The Prairies Is Closely Identified With Tree Planting

"In more than 7,000 miles of travel by the tree planting car of the Canadian Forestry Association this year we have yet to encounter a single farmer who has migrated from a well-treed farm. The secret of stabilized population of the prairies is closely identified with tree planting. Even in excessively dry districts, where migration was severe, the farmer with shelter belts of trees managed to make a better living, and certainly had no thought of quitting."

This statement was made in an interview by Angus G. Gooch, who returned after a season's work as assistant on the tree planting lecture car of the Canadian Forestry Association.

With 7,077 miles of prairie railway covered this season and audiences totalling 58,500 people, with 428 public meetings held in 146 communities, the tree planting car of the association is back to winter quarters here in Ottawa. On conclusion of this, the sixth annual tour of the car, the officials in charge report that as a consequence of persistent education of the western settler, tree planting was forging ahead as at no previous period. Already 80,000,000 trees have been planted by 45,000 farmers as shelter belts, with incredibly great benefits in larger production and more contented home life.

The early belief that trees could not be successfuly grown on the prairies has been thoroughly dissipated by the results attained by the forestry branch of the department of interior during the past 25 years in distributing free to farmers and others interested in promoting forest growth trees, seedlings and cuttings for planting on their property, either as windbreaks or for ornamental purposes.

An idea of the extent of this work may be gained from the fact that during the past shipping season, which extended from April 14 to May 1, 2,470,000 seedlings, cuttings and transplants were sent out from Indian Head to 3,080 farmers and 2,500,000 were distributed from Sutherland to 3,010 farmers.

Dairy Product Act

Amendments to the Dairy Produce Act and Regulations

The text of The Dairy Product Act as amended this year and regulations under the act have been published by the department of agriculture at Ottawa in uniform style with other acts relating to agriculture. There is one new amendment to the act authorizing the governor-in-council to make regulations that will enable the dairy produce grader to refuse to grade any dairy produce and to withhold grade certificates. Sections 24 to 28 inclusive have been added to the previous 23 of the regulations. These provide: That any butter cut or moulded into prints or blocks shall be deemed to be not graded, and that no person shall brand, mark, describe or advertise for sale as graded, butter which shall have been so cut or moulded; that a grader's certificate covering any such lots shall be deemed cancelled; that no person shall pack butter in a package bearing marks of previous grading; that no person shall sell, offer for sale or have in his possession butter branded, marked, described or advertised contrary to these regulations and that any butter on which mould has appeared, whether on the butter itself or on the parchment lining, even though all trace has been removed, shall be classified as "no grade."

World Poultry Congress

Alberta was represented by Hon. Geo. Hoadley, minister of agriculture, and J. H. Hare, poultry commissioner, at the meeting held in Toronto to consider plans for the world poultry congress to be held in Ottawa next year. Hon. Mr. Hoadley advocated formation of provincial committees to cooperate with the central committee to make the congress a success, and the plan was given support.

The only difference between meddling and investigating is that we always investigate and the other fellow meddles.

LOADING TWO GRAIN CARS A MINUTE IN RECORD CANADIAN NATIONAL MOVE

Deliveries of grain to the lakehead by the Canadian National Railways during September just closed exceeded the combined deliveries of September 1924 and 1923, according to grain figures issued at Winnipeg on Oct. 1st. 18,913 cars were delivered during September, 1925, against 4,651 in September, 1924, and 13,656 in the same month of 1923. The daily average for September, 1925, was 630 cars against the previous record of 322, established in September, 1923.

New records were made by the Canadian National in other branches of the grain movement also. Marketings during the month were 52,207,000 bushels against the previous high mark of 39,700,000 made in September, 1923. Loadings were 27,578 cars and 37,217,000 bushels during the month compared with 22,508 cars and 28,472,000 bushels in September, 1923. Total loadings on Canadian National lines to the end of September this year were 29,284 cars and 39,038,000 bushels, against 11,079 cars containing 14,632,000 bushels at the same date last year.

On several days toward the end of the month, loadings reached from 1,400 to 1,500 cars per day, which during the ten-hour working day required the loading of approximately two and a half cars per minute in order to reach this total. Reducing the time to seconds it was estimated that at least 60 bushels of grain (the contents of a farmer's wagon box) were loaded into a car on Canadian National western lines every second during the ten-hour working day.

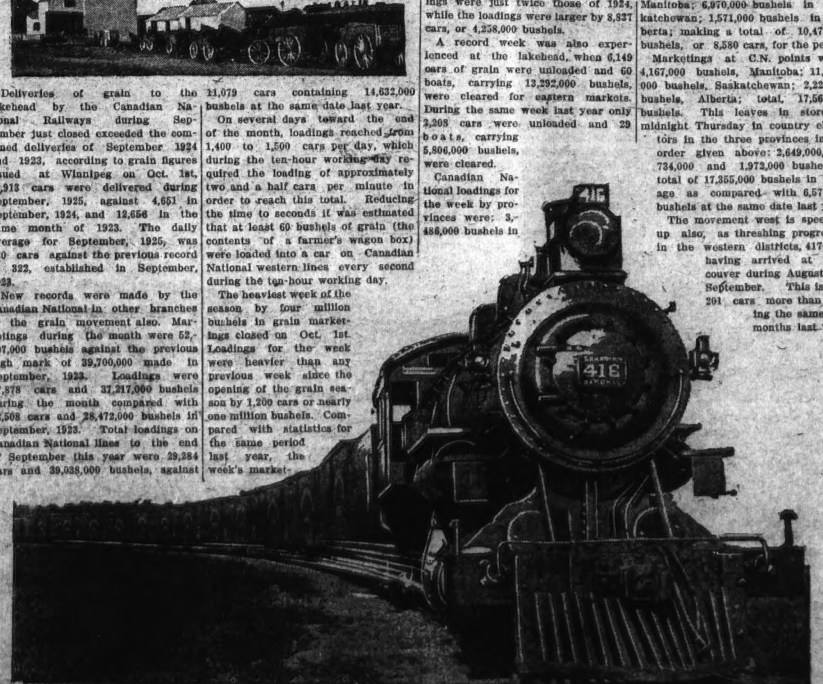
The heaviest week of the season by four million bushels in grain marketings closed on Oct. 1st. Loadings for the week were heavier than any previous week since the opening of the grain season by 1,200 cars or nearly one million bushels. Compared with statistics for the same period last year, the week's marketings were just twice those of 1924, while the loadings were larger by 8,837 cars, or 4,258,000 bushels.

A record week was also experienced at the lakehead, when 6,149 cars of grain were unloaded and 60 boats, carrying 13,292,000 bushels, were cleared for eastern markets. During the same week last year only 2,208 cars were unloaded and 29 boats, carrying 5,806,000 bushels, were cleared.

Canadian National loadings for the week by provinces were: 3,488,000 bushels in Manitoba; 6,970,000 bushels in Saskatchewan; 1,571,000 bushels in Alberta; making a total of 10,475,000 bushels, or 8,580 cars, for the period.

Markettings at C.N. points were: 4,167,000 bushels, Manitoba; 11,325,000 bushels, Saskatchewan; 2,220,000 bushels, Alberta; total, 17,568,000 bushels. This leaves in store at midnight Thursday in country elevators in the three provinces in the order given above: 2,649,000, 12,734,000 and 1,973,000 bushels, a total of 17,355,000 bushels in storage as compared with 6,579,000 bushels at the same date last year.

The movement west is speeding up also, as threshing progresses in the western districts, 417 cars having arrived at Vancouver during August and September. This is just 201 cars more than during the same two months last year.



Dress Turkeys Before Shipping

Whenever Possible Turkey Should Be Sent to Market in This Manner

Writing of the successful pool of turkeys in Saskatchewan last year, Acting Commissioner Waldron states that shippers through the live turkey pool were not as well pleased with results as were those who shipped the farm-dressed birds. Mr. A. G. Taylor, in his bulletin on "Turkeys and Their Management," published by the Dominion department of agriculture, advises that whenever possible turkeys should be sent to market dressed. Before killing, the birds should be starved during twenty-four hours and during that time given all the fresh water they will drink, which aids in cleansing the intestines and also improves the flavor of the flesh. Dressed birds, Mr. Taylor adds, should be thoroughly cooled before packing. Care should be taken to arrange them firmly in the packing cases to prevent moving while in transit.

Sweet Clover As A Pasture

Is Unequalled By Most Crops For Cattle and Hogs

As a pasture sweet clover has a carrying capacity unequalled by most crops. Cattle have been pastured on this crop at the Brandon experimental farm with no apparent ill-effects. The condition of the animals was in no way affected and the milk supply was maintained. According to a new bulletin on sweet clover distributed by the publications branch, department of agriculture, Ottawa, this crop makes a very soft feed when used alone and it is advisable to give the animals access to some form of dry roughage. In order to keep the crop from becoming rank and coarse it should be kept well pastured down. It withstands the effect of pasturing very well and it is possible to use even the first year's crop. Hogs may be turned on when the plants are 8 or 9 inches high, with good results.

One minute after garlic is eaten by a cow the flavor is present in the milk.

More Motor Cars In Sweden

Statistics Show Very Large Increase In Five Years

The number of automobiles in Sweden, government statistics show, increased from 8,506, or one for each 705 inhabitants in 1919, to 62,820, or one for each 95 inhabitants at the end of 1924.

The government's income from motor business last year included $1,423,314 taxes on automobiles, $774,043 on tires and $1,347,046 on gasoline.

BAREE, SON OF KAZAN
by James Oliver Curwood
A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page, & Co.

"BAREE, SON OF KAZAN," a Vitagraph Picture, With Wolf, the War Dog, is an Adaptation of This Story

SYNOPSIS

McTaggart, the post trader, finding Baree, the wolf-dog, trapped in one of his game snares, struck him a blow with a club. Then he bundled him into a sack and carried him to the cabin of Pierrot, the trapper, where he went to demand the hand of Nepeese, the trapper's daughter. The girl recognized Baree and when she saw he had been injured she turned in anger at McTaggart. Baree, freeing himself, fastened his teeth in the factor's leg. McTaggart drew his revolver, but Nepeese raised the dog in her arms.

CHAPTER XIII.—Continued.

"Let us leave them to fight it out between themselves, m'sieu," he said. "They are two little fire-brands, and we are not safe. If she is bitten——"

He shrugged his shoulders. A great load had been lifted from them suddenly. His voice was soft and persuasive. And now the anger had gone out of the Willow's face. A coquettish uplift of her eyes caught McTaggart, and she looked straight at him half smiling, as she spoke to her father:

"I will join you soon, mon pere—you and M'sieu the Factor from Lac Bain!"

There were undeniable little devils in her eyes, McTaggart thought—little devils laughing full at him as she spoke, setting his brain afire and his blood to running wildly. Those eyes—full of dancing witches! How he would tame them and play with them—very soon now. He followed Pierrot outside. In his exultation he no longer felt the smart of Baree's teeth.

Half an hour later Nepeese came out of the cabin. She could see that Pierrot and the Factor had been talking about something that had not been pleasant to her father. His face was strained. She caught in his eyes the smoulder of fire which he was trying to smother, as one might smother flames under a blanket. McTaggart's jaws were set, but the eyes flared up with pleasure when he saw her. She knew what it was about. The Factor from Lac Bain had been demanding his answer of Pierrot, and Pierrot had been telling him what she had insisted upon—that he must come to her. And he was coming! She turned with a quick beating of the heart and hurried down a little path. She heard McTaggart's footsteps behind her, and threw the flash of a smile over her shoulder. But her teeth were set tight. The nails of her fingers were cutting into the palms of her hands.

Pierrot stood without moving. He watched them as they disappeared into the forest, Nepeese still a few steps ahead of McTaggart. Out of his breast rose a sharp breath.

"Par les mille cornes du diable!" he swore softly. "It is impossible—that she smiles from her heart at that beast? Non! It is impossible. And yet—if it is so——"

One of his brown hands tightened convulsively about the handle of the knife in his belt, and slowly he began to follow them.

"His arms were about her like bands of iron."

McTaggart did not hurry to overtake Nepeese. She was following the narrow path deeper into the forest, and he was glad of that. They would be alone—away from Pierrot. He was ten steps behind her, and again the Willow smiled at him over her shoulder. Her body moved sinuously and swiftly. She was keeping accurate measurement of the distance between them—but McTaggart did not guess that this was why she looked back every now and then. He was satisfied to let her go on. When she turned from the narrow trail into a side path that scarcely bore the mark of travel, his heart gave an exultant jump. If she kept on, he would very soon have her alone—a good distance from the cabin. The blood ran hot in his face. He did not speak to her, through fear that she would stop. Ahead of them he heard the rumble of water. It was the creek running through the chasm.

Nepeese was making straight for that sound. With a little laugh she started to run, and when she stood at the edge of the chasm, McTaggart was fully fifty yards behind her. Twenty feet sheer down there was a deep pool between the rock walls, a pool so deep that it was like blue ink. She turned to face the Factor from Lac Bain. He had never looked more like a red beast to her. Until this moment she had been unafraid. But now—in an instant—he terrified her. Before she could speak what she had planned to say, he was at her side, and had taken her face between his two great hands, his coarse fingers twining in the silken strands of her thick braids where they fell over her shoulders at the neck.

"Ka sakahet!" he cried passionately. "Pierrot said you would have an answer for me. But I need no answer now. You are mine! Mine!"

She gave a cry. It was a gasping, broken cry. His arms were about her like bands of iron, crushing her slender body, shutting off her breath, turning the world almost black for her. She could neither struggle nor cry out. She felt the hot passion of his lips on her face, heard his voice—and then came a moment's freedom, and air into her strangled lungs. Pierrot was calling! He had come to the fork in the trail, and he was calling the Willow's name!

McTaggart's hot hand came over her mouth.

"Don't answer," she heard him say. Strength—anger—hatred flared up in her, and fiercely she struck the hand down. Something in her wonderful eyes held McTaggart. They blazed into his very soul.

"Bete noir!" she panted at him, freeing herself from the last touch of his hands. "Beast—black beast!" Her voice trembled, and her face flamed. "See—I came to show you my pool—and tell you what you wanted to hear—and you—you—have crushed me like a beast—like a great rock—— See! down there—it is my pool!"

She had not planned it like this. She had intended to be smiling, even laughing, at this moment. But McTaggart had spoiled them—her carefully made plans! And yet, as she pointed, the Factor from Lac Bain had looked for an instant over the edge of the chasm. And then she laughed—laughed as she gave him a sudden shove from behind.

"And that is my answer, M'sieur le Facteur from Lac Bain!" she cried tauntingly as he plunged headlong into the deep pool between the rock walls.

CHAPTER XIV.

From the edge of the open Pierrot saw what had happened, and he gave a great gasp. He drew back among the balsams. This was not a moment for him to show himself. While his heart drummed like a hammer his face was filled with joy.

On her hands and knees the Willow was peering over the edge. Bush McTaggart had disappeared. He had gone down like the great clod he was; the water of her pool had closed over him with a dull splash that was like a chuckle of triumph. He appeared now, beating out with his arms and legs to keep himself afloat, while the Willow's voice came to him in taunting cries.

"Bete noir! Bete noir! Beast! Beast——"

She flung small sticks and tufts of earth down at him fiercely; and McTaggart, looking up as he gained his equilibrium, saw her leaning so far over that she seemed about to fall. Her long braids hung down into the chasm, gleaming in the sun; her eyes were laughing while her lips taunted him; he could see the flash of her white teeth.

"Beast! Beast!"

He began swimming, still looking up at her. It was a hundred yards down the slow-going current to the beach of shale where he could climb out, and a half of that distance she followed him, laughing and taunting him, and flinging down sticks and pebbles. He noted that none of the sticks or stones was large enough to hurt him. When at last his feet touched bottom, she was gone.

Swiftly Nepeese ran back over the trail, and almost into Pierrot's arms. She was panting and laughing when for a moment she stopped.

"I have given him the answer, Nootawe! He is in the pool."

Nepeese was out of breath when she reached the cabin. Baree, fastened to a table-leg by a babiche thong, heard her pause for a moment at the door. Then she entered and came straight to him. During the half-hour of her absence Baree had scarcely moved.

Her touch thrilled him. It sent little throbs through his body, a tremulous quivering which she could feel and which deepened the glow in her eyes. Gently her hand stroked his head and his back. It seemed to Nepeese that he did not breathe. Under the caress of her hand his eyes closed. In another moment she was talking to him, and at the sound of her voice his eyes shot open.

In the past six months, 12,700 Canadian cattle have reached Manchester, this being an increase of 1600 per cent. over the correspondng period of last year.

FIGHTING FOR BABY'S HEALTH

Is the Constant Care of Every Young Mother

The young mother has a constant care in looking after the welfare of her little ones. Childhood ailments come on so suddenly—sometimes without a minute's warning—the mother may have a very sick baby on her hands before help can be obtained. That is unless she has a remedy in the house which she can safely give the baby for any of the many minor ailments of babyhood and childhood.

Such a remedy is found in Baby's Own Tablets. Thousands of mothers throughout the country always keep a box of the Tablets on hand and they prefer them to be without an equal for sweetening baby's stomach; regulating his bowels, and thus driving out constipation and indigestion, colds and simple fevers, and making the dreaded teething period easy.

Baby's Own Tablets are an absolutely safe remedy. They are guaranteed to be free from opiates or any other narcotic drug which are so harmful to the future welfare of the baby. Mothers, if you value the life of your little ones give him Baby's Own Tablets to ward off illness. The Tablets are sold by medicine dealers or will be sent to any address, post paid, at 25 cents a box by addressing The Dr. Williams Medicine Co., Brockville, Ont.

Famous Man's Favorite Books

Four Out of Eleven Enjoyed By Steinmetz Were Written For Children

The late Charles P. Steinmetz, the crippled immigrant lad who became a famous electrical engineer, was once asked what books he most enjoyed. Here is the list:

"The Odyssey," "Faust," "Odes and Other Poems" Horace, "Roman History" Mommsen, "The Jungle Books," "Treasure Island," "Darkest Africa," "Tom Sawyer," "Huckleberry Finn," "Midshipman Easy," "The Deluge."

At least four of the eleven are children's books! Yet reading them helped to keep one powerful and useful mind alert to intricate problems.—Collier's.

After shaving—Minard's Liniment

Moved 280-Foot Bridge

Engineers moved a two hundred and eighty-foot span of a bridge a distance of ninety-three feet when rebuilding the Waterloo Bridge in London. The span was moved along steel girders by eight men turning winches that slid the giant framework and its five hundred tons of weight at the rate of four feet an hour.

A scientist is a man who can discover a fragment of ancient thigh bone and tell how long the animal's jaw was.

Minard's Liniment for Sore Back

CANCER

The potassium treatment which, first presented by the late Dr. F. W. Forbes Rose in England in 1911, has been scientifically perfected, has won the gratitude of countless Canadian and American sufferers who have experienced its unrivalled success. By combining the two words "Cancer" and "Potassium," this home treatment for all diseases caused by the universal potassium starvation is legally protected by patent under the name of

THE CANTASSIUM TREATMENT

Experience of many thousands confirms the great English authority's statement:—"CANCER IS A BLOOD DISEASE CAUSED BY POTASSIUM DEFICIENCY," and, if such deficiency is remedied, even far advanced and apparently hopeless cases will retrograde without surgical operation, radium or X-ray tortures and needless expense. Medical men in all parts are recommending or adopting Cantassium Treatment on behalf of their patients, and hundreds of thankful letters from restored cancer victims speak of AUTHENTICATED RESULTS which bring justified hope to present sufferers.

A most interesting book, which will be mailed YOU free of charge, explains the CAUSE and the most rational methods of avoiding the disease, or treating it where it already exists. The co-operation of every reader of this paper is earnestly requested in fighting the Cancer Scourge by studying its Cause and Treatment and spreading the knowledge acquired.

Cancer claimed 150,000 victims on this continent last year.

Cancer strikes rich and poor alike without warning. Protect yourself and dear ones without delay by sending for this FREE BOOK to

Canada's Century

Restricted Immigration Is Advocated For Dominion by English Writer

"This century will witness a development in Canada in all ways similar and equal to the development in the United States in the 19th century," a writer in the London Outlook declares, and he adds: "In the long run, provided that the present policy is maintained of encouraging the immigration only of the nordic races, Canada will produce a finer nation than the one in the making in the United States where a policy of indiscriminate admission of immigrants was pursued until recently."

Very Good

Teacher: "Give us a sentence using three words: Defeat, defence and detail."

Pupil: "De feet went over de fence before de tail."

ABLE TO DO HOUSEWORK NOW

Sick a Year. Got Great Benefit from Lydia E. Pinkham's Vegetable Compound

Bloomington, N. S.—"I took Lydia E. Pinkham's Vegetable Compound for pains and backache, also for nervousness, sick headaches and sleeplessness. I was troubled in this way for over a year, and a friend told me about the Vegetable Compound and induced me to take it. I must say I have received great benefit from it and am able to do my housework now. I recommend the Vegetable Compound myself and am willing for you to use this letter as a testimonal."—Mrs. WILLIAM MORSE, Bloomington, Annapolis County, N. S.

Do you know that in a recent canvass among women users of the Vegetable Compound over 220,000 replies were received. To the question, "Have you received benefit by taking this medicine?" 98 per cent. replied "Yes."

This means that 98 out of every 100 women are in better health because they have given this medicine a fair trial.

Mrs. Morse is simply another case of a woman receiving "great benefit." Women suffering from the troubles so common to their sex should listen to what other women say who have experienced the same sufferings and found relief. Give this dependable medicine a chance—and at once. It is sold at all drug stores.

NUMBER 23 THE PROPRIETORS

BRITAIN TAKES STEPS TO CURB RED ACTIVITIES

London.—Police raided the headquarters of the Communist party in London and also one of the London branch offices and arrested six Communist officials. Numercus papers and publications were seized.

The Communist political bureau later issued a statement, describing the incident as "the first step in the new attack on the working class."

This, says the bureau, was foreseen, and it recalls the party's advice to form a workers' defense corps.

"The Communist party," it declares, "will not, and cannot be, smashed. Close the ranks, strengthen the party, continue to fight for class unity against the coming capitalist offensive."

Communist activities in England during the past few months have gone far beyond the propaganda and industrial agitation stage. Attempt has been made to foment a revolt against the government and a large membership has been built up, particularly among the foreign population. As a result of this threat against organized authority, police action commenced which was deemed necessary.

Trade With Russia

No Early Prospects of Trade Relations Between Britain and Soviets

Ottawa.—There are no early prospects of trade relations between Soviet Russia and Britain being restored with the Baldwin Government in power, declared Right Hon. Arthur Henderson, former home secretary in the MacDonald Labor Government, in an interview here.

When it was suggested that such a happening might have distinct effects on Canada in the matter of wheat marketing, Mr. Henderson said that there were other considerations besides wheat, and if Russia was to regain her large production of wheat, she would need agricultural implements, many of which Canada was able to supply.

Asked about conditions in Britain, the former home secretary said it was the industries which depended on export trade that were the hardest hit by present conditions. He said the feeling was strong in Britain in favor of Germany being admitted to the League of Nations, as it was felt that would help to ease the diplomatic situation and give better assurance of peace. Until that happened there could be little hope of betterment as regards economic conditions, he said.

Annual Sheep and Swine Show

Will Be Held November Third, Fourth and Fifth

Regina.—The annual sheep and swine show will be held here November 3, 4 and 5, it was decided at a meeting of the board of directors of the Exhibition Association held in the Stadium. The dressed poultry show will be held November 3. Prizes valued at $450 will be given at the poultry show. Professor M. C. Herner, Manitoba Agricultural College, will be the judge.

A. J. McKay, MacDonald, Man.; Professor H. Wood, Manitoba Agricultural College, will judge sheep. L. Hancock, Winnipeg, and A. E. Potter, Langbank, Sask., will judge swine.

Extension For Edmonton Post Office

Edmonton.—Extensions to the Edmonton past office which will involve the building of a new wing may be undertaken next year by the Dominion Government. The purchase of nearby property, involving an outlay of some $52,000 has already been authorized by order-in council and part of this amount has been paid over.

Fires Hurt Fur Production

Olympia.—As a result of forest fires which swept areas from Northern British Columbia to Southern Oregon last summer, this section will produce less fur this year than many years. The dense smoke and fires came at a time when most of the fur-bearing animals were rearing their young.

Japan may send six girl tennis players to the United States in 1926 for tourney play.

Maritimes Ask For Freight Rate Cut

Brief Prepared For Board of Railway Commission Published

Halifax.—The brief prepared by F. C. Cornell, freight rates expert employed by the three Maritime Provinces to present their case to the board of railway commissioners for Canada, has been distributed here for publication.

It asks for "special attention from a transportation point of view" in consideration of the geographical position of the Maritimes and nature of their products in comparison with those of other provinces and in view of the fact that "the prosperity of the Maritime provinces depends to a serious extent upon their ability to merchandise the products of their natural resources and their manufactured products in the central and western provinces."

The brief declares recent changes in freight rates have wiped out considerations which were justly due the Maritimes and provided for in previous agreements. It asks for substantial reduction in added costs of freight originating in the Maritimes for Western and Central Canada and on freight passing through North Atlantic ports in the Maritimes.

Would Undertake Another Arctic Trip

Captain Bernier at Seventy-four is Still Vigorous

Quebec.—"I am still young and vigorous and as ready to start off again if it is believed my services are necessary, but if I am judged by my worth and have earned a pension I hope the government will grant it me." Thus spoke the veteran skipper, Captain J. E. Bernier, commander of the Canadian Government auxiliary schooner Arctic, and noted explorer, to a gathering of newspapermen. Captain Bernier, who is in his 74th year, has just returned from a trip to northern waters undertaken at the request of the authorities at Ottawa. While off the coast of Greenland he suffered a bad fall when struck by a swinging boom, but made light of the bruised side that resulted from the accident. However, he will be X-rayed. It is believed the voyage just completed by the Arctic was the last she would take with the veteran captain at the wheel.

Giant British Dirigible

Plan to Launch and Pick Up Planes in Mid-Air

London.—When the R-33, Britain's great airship, makes its next trip, expected shortly, it will begin a series of experiments in launching and picking up aeroplanes in mid-air. The plane to be used will be a light De-53.

The idea behind the experiments is to use airships in war as mother ships for a flock of hornets to be launched from behind concealment clouds of smoke to harry the enemy. An apparatus like a trapeze has been fixed below the airship to which the plane will be hooked. It will be launched from the trapeze and it is to attach itself to the trapeze on its return.

France Can Use Wheat Flour

Paris.—France is to return to the use of all wheat flour as a result of the good harvest this year, and the law which made it obligatory, because of the poor harvest last year, to add four per cent. of rye to all the wheat flour used in France, is to be abrogated.

Should Exercise Caution

St. Paul, Minn.—Fright may develop stomach trouble, and jealousy may lead to acute heart disease, Carl D. Camp, professor of neurology at University of Michigan, told the Inter-State Post graduate Assembly of Physicians.

Will Fund War Debt

Bucharest, Rumania.—The Rumanian newspapers announce that M. Tulesko, minister in London, has reached a tentative agreement with the British Government for the funding of Rumania's £26,000,000 war debt to Great Britain.

Increasing Gold Output

Toronto.—If the July and August rate of gold production in Ontario is maintained throughout the balance of the year, Ontario's gold output in 1925 will reach a total of $30,500,000, as compared with $25,669,305 in 1924.

FRENCH VIEWS ON FUNDING OF WAR DEBT TO U.S.

Paris.—The French Government intends to send a counter-proposal to the United States relative to the funding of the debt to America, it was officially admitted at the ministry of finance.

The proposal brought back from Washington by the debt commission for a five-year "breathing spell" during which France would pay $40,000,000 a year, still is being studied with no final decision in sight, the United Press was told.

However, the reported intention to make a counter-proposal is taken to mean that the result of the Washington negotiations has already been rejected.

Britain Wants Western Butter

London Importers Send Representative to Saskatchewan to Solicit Shipments

Regina.—Representing one of the largest importers of farm and dairy produce in the United Kingdom, A. J. Mills and Company, London, C. V. Gillespie has arrived in Regina, the first representative of a London firm to come to Saskatchewan in quest of butter for the English market. He is soliciting direct shipments from the Saskatchewan Co-operative Creameries and other firms instead of through speculative channels.

Mr. Gillespie said the improvement in Saskatchewan butter in recent years, and even in the last year, was "amazing" British importers. Western Canadian butter had been elevated to a position second only to that of New Zealand, a country which, for many years, had held first place in quality.

He believed the Canadian west could, and would, capture a very large share of the total imports to Great Britain, and expressed his belief that the dairy trade in the west would grow to vast proportions.

University Head On Culture

Victoria.—"Culture' which has no bearing upon life, is exotic, artificial and as meaningless as the buttons on the back of a man's dress coast, or the nose ring of an African savage," said Dean H. T. J. Coleman, of the University of British Columbia, who addressed the opening session of the British Columbia School Trustees' Association annual convention here.

Register At the Hague

Victoria.—After depositing in the Peace Palace at The Hague, Holland, the register signed last May by 35,000 pupils of British Columbia schools, pledging themselves to observe the spirit of fair play and good-will among all peoples, Harry Charlesworth, secretary of the British Columbia Teachers' Federation, has returned to his home here.

Urges Demand For Imperial-Made Goods

Lady Cowan Asks Canadian Women to Put Empire First

Ottawa.—That the women of Canada should foster the idea now so prevalent among the women of England, of demanding Imperial-made goods, was the desire expressed by Lady Cowan, a well-known member of the British House of Commons, who is among the delegates to the Interparliamentary Union, who addressed a largely attended meeting of the Ottawa University Women's Club.

Lady Cowan, who has been the president of the British Women's Patriotic League for the last five years, told of the work the women were doing in England.

The league has for its motto: "Our Country First."

"I am an internationalist," the speaker stated, "but I am a patriot and a lover of my country first."

Women today can become anything they want, Lady Cowan said. There are unlimited possibilities of public service and there is an open door to any profession. It won't be long, the speaker predicted, before there may be a woman premier.

Secure Settlers For Canada

New Methods To Be Adopted By Office In Britain

London, Eng.—How interviews will replace the typewriter, and the personal touch will be substituted for correspondence in order to secure settlers for Canada, was explained by W. Bruce Walker, Canadian director of European emigration, in an interview with a representative of the Morning Post. Mr. Welker stated that though the Dominion wants agriculturists, those who go on the land now will pave the way for the unemployed industrial surplus when other industries expand.

The Post, in an editorial extolling Mr. Walker's plans, regrets that some politicians and certain newspapers lead Canadians to believe that England's day is done and that the greater part of her population is existing on doles.

Would Abolish Level Crossings

Attorney-General of Ontario Says This the Only Real Safeguard

Toronto.—Having in mind the terrible tragedy at Scarboro Junction, near here, when six persons lost their lives when an automobile in which they were riding was struck by a Canadian National flyer, Hon. W. F. Nickle, attorney-general of Ontario, stated that the abolition of level crossings is the only real safeguard to human life.

He refuses to entertain any thought of half-way measure such as compelling motorists to come to a stop at every level crossing, as suggested by an official of the Canadian National Railways.

Talented French Artists Arrive in Canada

New company of talented French artists which M. J. A. Gauvin has brought to Montreal from Paris for a season of French comedy, photographed upon their arrival in Montreal. The company crossed from Europe on the Canadian Pacific steamship Melita and remained in Quebec for a week or so before coming to Montreal to open the season. They are (left to right, front row) Mme. Marcelle Geniat, M. Georges Colin, M. Jean Garat, M. Jean Martini and M. Paul Mauge, a local theatrical man; (back row) M. M. Herraud, M. Rene Blancard, M. G. Vitray, M. Rene Montie, Mme. Marthe Marsans, Mme. Maia Floriam and M. Adeline Fournier. Two members of the company, Mme. Marguerite Courtan-Lambert and Mme. Jeanne d'Hertbay were absent when the photograph was taken.

SECURITY PACT TO PREVENT FUTURE WARS IN EUROPE

Locarno.—If France can secure suitable guarantee for her eastern allies it seems probable that the long sought for security pact which would apparently make future wars in Europe impossible will shortly become effective.

In principle the greater opinion of the pact has been agreed upon, but there still remains to be ironed out satisfactorily for Germany and France the question of guarantees for the integrity of Poland and Czecho Slovakia.

There is optimism that a formula for this, in the nature of mutual guarantees under the League of Nations covenant, will be found.

The Polish problem, particularly the question of the Polish corridor to the sea, still troubles the conference, was the impression given by Right Hon. Austen Chamberlain, British foreign secretary, who said that he and Sir Cecil Hurst, the English jurist, had placed their services at the disposal of the delegates in an endeavor to reach an agreement concerning Germany's eastern frontiers.

Mr. Chamberlain was optimistic over the possibilities of bringing Germany and Poland together.

Sandow Dies In England

Was Professor of Physical Culture to King George

London.—Eugene Sandow, once hailed as "the world's strongest man," died suddenly, Oct. 14 in London, where he had recently built up a practice as a health specialist. It is believed death was due to the effects of a motor accident in which he was injured some years ago. Like Sigmond Breitbart, whom he preceded as "the world's strongest man" and who died in Berlin recently Sandow was of German nationality. He was born in 1867 and is said to have been frail in his youth.

Sandow was a great exponent of physical culture for the average man, and claimed anyone could become strong who underwent his course of training. His activities in this direction were recognized in England in 1911 with his appointment by Royal Warrant as professor of physical culture to King George.

To Hold Conference On Seamen's Strike

Parties to Dispuee Summoned to Meet In Australia

Melbourne, Australia.—In view of the improved shipping situation as a result of the report of the unofficial strike of British seamen being called off, Mr. Justice Powers, of the arbitration court, has summoned a conference of all the parties to the dispute for October 19 in Sydney. He states the dispute exists in all the Australian states and is a serious matter for Australia. British shipowners have declared the ports of Freemantle and Perth "black," and the British seamen have declared the shipowners vessels "black," each side claiming the other is unfair, and the exports from Australia to England have been seriously retarded.

Western Grain Port

Predicts Large Grain Movement Out Of Vancouver This Season

Vancouver, B.C.—The port of Vancouver will handle at least 65,000,000 or 70,000,000 bushels of export grain during the shipping season of 1925-26, according to a prediction made by Leslie H. Boyd, K.C., chairman of grain board of Canada.

Mr. Boyd said he was not in a position to give any statement officially, but from his general knowledge of conditions he thought Vancouver would see a very large movement.

Meteorite Weighs Seven Tons

Aberdeen.—The third largest meteorite in the world has just arrived here from Greenland aboard the Danish schooner, Sokongen. Nobody has yet seen the stone, but Captain Pedersen, of the Sokongen, says it weighs seven tons. Eskimos are attributed with the statement that the meteorite fell in 1918 and that they had been dragging it toward the coast on dog sleds since 1923.

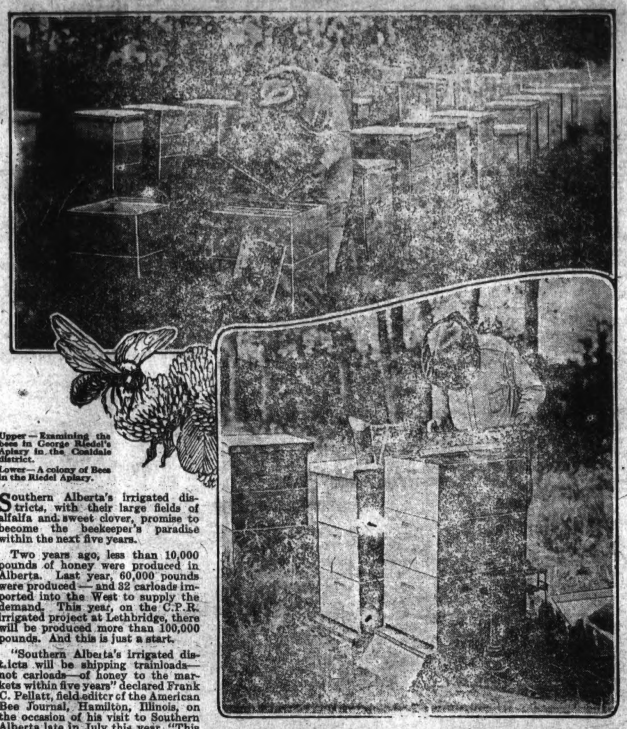
Southern Alberta is Beekeeper's Paradise



Upper—Examining the bees in George Riedel's Apiary in the Coaldale district.

Lower—A colony of Bees in the Riedel Apiary.

Southern Alberta's irrigated districts, with their large fields of alfalfa and sweet clover, promise to become the beekeeper's paradise within the next five years.

Two years ago, less than 10,000 pounds of honey were produced in Alberta. Last year, 60,000 pounds were produced — and 32 carloads imported into the West to supply the demand. This year, on the C.P.R. irrigated project at Lethbridge, there will be produced more than 100,000 pounds. And this is just a start.

"Southern Alberta's irrigated districts will be shipping trainloads—not carloads—of honey to the markets within five years" declared Frank C. Pellatt, field editor of the American Bee Journal, Hamilton, Illinois, on the occasion of his visit to Southern Alberta late in July this year. "This is the greatest potential honey producing district in North America."

Today, one apiarist in the Coaldale district on the C.P.R. irrigated project has 600 colonies of bees. This man, C. George Riedel, came to Southern Alberta from California in the spring of 1924 and started with 300 colonies. In 1926 he will have 1800 colonies and will make more than 150 tons of honey. This year his bees will make him about 50 tons, and one wholesale firm having branches throughout the West is handling the whole output.

Each colony of bees makes about 200 pounds in a season, though one colony at the Lethbridge Experimental Farm broke all records for Canada by making 472 pounds in the season of 1923. A record of 21 pounds in one day by one colony was made in 1923 when the bees at the Experimental Farm averages 189 pounds for the season, the high record for the year at the experimental farms across Canada.

WORLD HAPPENINGS BRIEFLY TOLD

Silk valued at $250,000 was stolen from a building in Madison Square, New York, by four robbers, who left the watchman handcuffed and gagged.

Banking interests of Northern Italy are negotiating for the purchase of 40,000 acres of farm lands in Manitoba, on which it is planned to settle 500 families.

"In my opinion the Indian uses less drugs in his daily life than the Englishman, Canadian or American," declares Wardlow Milne, Kidderminster, British parliamentary member.

Western ranchers and farmers will stop raising cattle unless the discrimination against them in shipping for export is removed, declares Dr. R. Russell Ormiston, Winnipeg, of the Dominion department of agriculture.

Leon Trotzky, his health undermined by his strenuous labors at the economic tasks assigned him on his return to Moscow five months ago, has been compelled again to relinquish active participation in the Soviet regime.

A Bosnian farmer at Sofia has become rich beyond his dreams. He has sold a huge ash tree off his farm to an Austrian manufacturer for $25,000. The value of the tree consisted in its marble-like veins and cross-color patches.

Royal household budgets these days are subject to the same economic laws as those of humbler individuals, and Queen Wilhelmina has found it necessary to notify all her employees that their salaries will be cut by 10 per cent. as from January 1 next.

If Miller's Worm Powders needed the support of testimonials they could be got from mothers who know the great virtue of this excellent medicine. But the powders will speak for themselves and in such a way that there can be no question of them. They act speedily and thoroughly, and the child to whom they are administered will show improvement from the first dose.

The number of defaced coins returned to the mint at Philadelphia, Pa., to be remelted would fill five trains of 56 cars each, holding 50,000 pounds to the car.

Chas. M. Brush

—Levy's Studio

"To build up a rundown constitution or to strengthen the nerves, I know of no better medicine than Dr. Pierce's Golden Medical Discovery," said Chas. M. Brush of 408 Caron Ave., Windsor, Ont. "I had become in a rundown condition, my nerves were bad, and my stomach gave me a great deal of trouble. I would have spells of nervous indigestion. But after taking a few bottles of Dr. Pierce's Golden Medical Discovery, my health was much improved and my nerves were stronger. I did not have any more spells of nervous indigestion. 'Golden Medical Discovery' seemed to tone up my entire system and made me feel much improved physically."

At all drug stores, or send 10 cents to Doctor Pierce's Laboratory in Bridgeburg, Ont., for trial package.

Bears Charmed Life

Grand Duke Cyril of Russia Has Many Narrow Escapes

Grand Duke Cyril of Russia, apparently bears a charmed life.

He was blown up on board a Russian battleship at Port Arthur during the Russo-Japanese War and since has had several narrow escapes, including a recent attempt to ascend the Russian throne.

Cyril was a passenger recently on the Paris-Prague express which, while running at a high rate of speed, dashed into a freight train, during a fog, 18 miles from Strasbourg, France.

Two train hands were killed in the collision and one passenger was slightly injured.

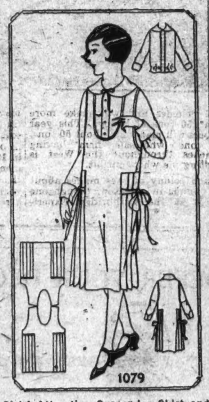
Cyril was not hurt.

Cold on the Chest Best Treated This Way

When the throat is sore, and the chest is tight and full of congestion, something strong enough to penetrate through the tissues must be applied quickly. To get the quickest results, apply good old Nerviline. Rub it in deeply; it won't burn or blister, but it will bring the blood to the surface, will draw out the inflammation and subdue your cold and make you well in a short time. No other liniment so potent, so strong, so quick to bring soothing and relief as reliable old "Nerviline." Nearly fifty years in use, and sold in most countries throughout the world in large 35c bottles.

ECLIPSE FASHIONS

Exclusive Patterns by Hazel Dayton



Girls' Attractive Suspender Skirt and Blouse

A charming frock featuring the plaited flare at the sides, which is bound to be a favorite with girls, whether on a vacation or at school. Individuality in taste may be expressed by having the skirt of one color material, and the blouse of another but harmonizing color. Many mothers have short ends of material in the sewing room, and this model offers an excellent opportunity to use them. The accompanying diagram gives a very clear outline of the frock, and a chart with full directions is included with the pattern. Sizes 8, 10, 12 and 14 years. Size 10 years requires 2 yards of 36-inch material for the jumper, and 1¼ yards for the blouse. Price 20 cents.

Home sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make without difficulty an attractive dress. Price of the book 10 cents the copy.

The Causation Of Cancer

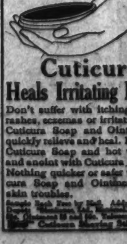
Faulty Diet Largely Responsible For This Ailment

Much public interest has manifested itself regarding the cause of cancer, but few people mentally digest the fact that to primitive races leading primitive lives cancer is unknown. With this evidence of the disease being confined to civilization is supplemented the knowledge of thousands of cancer patients having been restored to normal health by the administration of certain assimilable potash salts. Dr. Robert Bell, M.D., F.R.C.P.S., etc., for many years the leading cancer surgeon of Europe, promptly relinquished the extremely lucrative part of his practice when he demonstrated beyond dispute that cancer is a blood disease resulting from refined and faulty diet which deprives its consumers of the vital principles essential to disease resistance and health preservation. In recent years, the English press has frequently drawn attention to the phenominal success attending Dr. Bell's purely medicinal and dietetic treatment of the deadly disease, in conjunction with hygienic precaution.

A letter from Barton Scammell, M.S.C.I., published in London Eng., Truth, 26 August, 1925, contains the following statements which profound experience has proved of vital importance to many cancer victims: "The radio-active alkali, potash, is the great oxygen-attracting element in the body. It forms over 70 per cent. of the mineral ash of the red corpuscles in the blood. Owing to certain defects in diet and the preparation of food, the modern civilized world suffers from "potassium starvation," and the increase of cancer is a corollary of this state of affairs. The great work of the late Dr. Forbes Ross finds an explanation in this discovery, also it explains the success secured in the treatment of cancer with the administration of attenuated solutions of citrate and radio-phosphate of potash —which restore the recuperative power of the blood, thus causing the cancer to retrograde and disappear."

If fathers and mothers of the Great Northwest would abandon their white flour, white sugar and other "foodless foods" from which all health-preserving potash has been refined, and adopt whole-wheat bread, wholesome brown sugar and such "roughage" in their diet as is necessary to avert the now universal constipation, which is the forerunner of every case of cancer, much will be done to prevent the increase of this self-inflicted disease.

So long, however, as only the eye and vitiated palate are pleased while the digestive organs are overworked until ill-health, disease and premature death terminate the life of each follower of the existing diet of a civilized world, the death rates from cancer and other self-inflicted diseases will continue to rapidly increase. Cancer and a normally healthy blood stream are incompatible, but if we persist in indulging in food poisoning for the sake of the deceptive auto-intoxication it produces before striking us in our weakest spot, the inevitable penalty exacted by outraged Nature must be paid in due time.—Charles Walter, 51 Brunswick Avenue, Toronto, Canada.



Cuticura Heals Irritating Rashes

Don't suffer with itching, burning rashes, eczemas or irritations when Cuticura Soap and Ointment will quickly relieve and heal. Bathe with Cuticura Soap and hot water, dry and anoint with Cuticura Ointment. Nothing quicker or safer than Cuticura Soap and Ointment for all skin troubles.

Sample Each Free by Mail. Address Dept. L, Cuticura Laboratories, Malden, Mass. Cuticura Soap (25c) and Ointment (25 and 50c) are sold throughout the world. Cuticura Shaving Stick, 25c.

Nobel Prizes Total About Four Million

Germany and France Head List With England Third

Prizes of about $4,000,000 given to 125 winners, will be the record of the Nobel Foundation on the occasion of its 25th annual awarding of prizes at the end of this year.

Funds of the foundation now amount to slightly over $8,000,000, and the prizes to be given this year will be 118,165 kroner each, or about $31,000. Besides the five regular prizes of 1925, three were held over from 1924, namely; the awards in physics, chemistry and the peace prize.

Of the prizes awarded during the years 1901-1924 nine have gone to America and seven to Sweden. Germany tops the list with 26 prizes, closely followed by France with 21 and England with 14 awards.

A handy size package for occasions when half a pound is "just right."

Stony Plain and District.

A meeting will be held in Stony next Tuesday evening, in the interests of Mr East, the Labor-U.F. Candidate. Hon J E Brownlee will give an address on "Federal and Provincial Policies of the Day."

At the meeting at Golden Spike Monday night, in the interests of Mr Stewart, the schoolhouse was crowded to the doors, and a very interesting time was experienced. The politicians from Stony and the City did not have things their own way, by any means. A local farmer with "progressive" ideas was given the floor and gave his views in a fairly clear manner. Another "progressive" the local Tubal Cain, did not accept an offer to the platform, but contented himself with giving the Liberal speakers a little friendly criticism from his seat. Mr Stewart's followers held a meeting in the Manly school house last night which was addressed by Mr Boychuk and others. Another meeting is billed for Blueberry school tonight, with one at Big Island school Friday night.

A Harvest Thanksgiving Festival will be held at St Matthew's Lutheran Church, Spruce Grove, on Sunday next Oct. 25. Confession at 10.15 a. m. and service at 10.45 a.m.

The ratepayers of Glory Hills S. D. held a meeting on Monday last, to discuss the advisability of erecting a building to replace the school rooms destroyed by fire a short time ago. Classes are now being held in the commodious house formerly occupied by Pastor Birks.

T H Vansiever shipped a car of stock from Duffield last week, thru the U.F.A.

The advantage of having your cattle branded was well illustrated last week at a point not far west from Stony when a stock-raiser took a 3-year-old steer which had his brand on, from a shipper who was about to load it on a car with his other cattle.

The usual good time was enjoyed at the Holborn popular dance Friday night last by all who had the privilege to attend.

The Conservatives' Meeting.

The meeting held in Stony Plain Saturday night in the interests of James Douglas, Conservative candidate for West Edmonton, was well attended.

The first speaker up, Wm Wells, Edmonton's well known lawyer, gave an address which proved very informative, the speaker dealing with subjects of federal interest in a very interesting manner.

The candidate, Mr James Douglas, then took the rostrum; in his opening remarks

Jas. Douglas, Conservative Candidate in West Edmonton.

stating he had sat in the House of Commons for several parliaments as a representative Liberal, and explained why he had left the Liberal ranks and adhered to the party led by Mr Meighen Mr Douglas' former leader. Mr King, came in for some severe criticism at the hands of Mr Douglas. The latter is a protectionist, pure and simple; and claimed the prosperity of Canada depended on the putting into force of a much higher tariff than is at present on the statute books.

Mr Ewing, former leader of the Conservatives in Alberta Legislature, gave an address which dealt with the issues of the campaign in a very able manner.

Postoffice News

Hon Chas Stewart, Minister of the Interior, who has been steadily pushing the Postoffice Dept. of the Government at Ottawa for re-establishment of Edmonton as a postal division, announces that the Edmonton postoffice will shortly be restored to its old position of a full postal division. Arrangements were completed this week for re-assembling the staff and equipment. Edmonton was closed as a postal division in 1920, and the work divided between Calgary and Saskatoon. Strong protests were made by the boards of trade and other bodies in Northern Alberta.

Representations were made to Hon Charles Stewart, and this gentleman undertook to do all in his power to bring about a change and has finally succeeded.

Those residing in Stony and district will remember, early in the summer, when they were suffering from a very curtailed postal service, that it was the Hon Mr Stewart who brought about the much desired change; and it is to this gentleman's efforts we are indebted for the first-class mail service we are now enjoying, along with the other towns on this line as far west as Edson.

Here and There

The total handlings at the new internal government elevator in Edmonton, Alta., since its opening last fall, amount to 2,350,000 bushels. Of this quantity of grain handled, more than 2,000,000 bushels was wheat.

With the completion of the 1926 assessment for Toronto, the Chief Assessor announced that the city's population is now 549,429, or 7,012 greater than last year. The total assessment for 1926 is $891,673,797, which is $16,259,443 higher than for 1925.

A new high-water mark for the 1925 season of navigation in regard to number of passengers landed at Quebec over a week-end, was established during the week-end of September 6th when six boats docked with nearly 5,000 passengers. The three Canadian Pacific steamers, the Montroyal, Marloch and Melita, brought 2,524 of the total passengers landed.

Between four and five hundred travelling passenger agents, representing railway throughout the United States and Mexico, united with representatives of the Canadian railways and steamship companies in Montreal during the week ending September 19th, for the fiftieth annual convention of the American Association of Travelling Passenger Agents.

In succession to Captain James Gillies, who was recently appointed general manager Canadian Pacific steamships in London, Captain R. G. Latta has been appointed to the command of the Empress of Scotland, flagship of the Canadian Pacific fleet. Captain Latta was previously on the bridge of the "Montroyal" and other vessels of the same line.

Arrangements are being made for the holding of the western annual meeting in Winnipeg from November 3rd to 5th of the Canadian Institute of Mining and Metallurgy. The meetings will be held in the Royal Alexander Hotel. Delegates from all points in the West, as well as from Eastern Canada, are expected to attend.

A memorial known as "The Altar of Peace" has recently been unveiled in Stanley Park, Vancouver, to symbolize the spirit of international good-will existing between the United States and Canada. The memorial was raised by joint subscription of United States and Canadian Kiwanis Clubs, and stands on the spot where the late President Harding delivered the last speech of his life while visiting Canada, in July, 1923.

One of the largest shipments of live foxes for export ever to leave Prince Edward Island, left recently for New York for transshipment to Norway. The shipment comprised 200 foxes in all, with a gross value of $40,000. Several small shipments of animals were consigned to Norway last year and this large order has followed the success which the Norwegian breeders have had with those animals previously sent from this country.

As illustrating the volume of grain delivered by the Port of Montreal compared with that of Vancouver, figures given by the Pacific coast port for the crop year ending July 31 last, show Montreal deliveries were six and three-quarters times those from the British Columbia port. Vancouver shipped 25,135,218 bushels of grain for the crop year ending July 31, while Montreal, during this period, disposed of 160,929,013 bushels.

E. W. Beatty, president and chairman of the Canadian Pacific Railway, accompanied by several of his directors is at present engaged in the annual tour of inspection of the company's system. In an address to the directors of the Canadian National Exhibition in Toronto Mr. Beatty declared that the "only safe and certain cure for the relief of the Dominion's railway obligations rested upon the country's industrial and agricultural development."
